## TOWN OF THOMASTON WATER POLLUTION CONTROL AUTHORITY – NOTICE TO RESIDENTS

### Kennedy Drive Pump Station Force Main Replacement Contract

Dear Resident:

This letter is to inform you that a construction project in your neighborhood is scheduled to begin in the near future.

The Thomaston WPCA owns and operates and maintains a sanitary sewage pump station at the end of Kennedy Drive. This pump station pumps sewage through an existing 6" cast iron force main west to Old Northfield Road, south to Walnut Hill Road, and then southeast to an existing gravity sewer main.

This force main was originally installed in 1972. A total of 3 breaks in this force main have occurred in the past, for a variety of reasons. The Thomaston WPCA, in its ongoing effort to improve their collection system, has begun the steps to replace the portion of this aging cast iron force main where breaks have occurred in the past with new PVC force main.

This construction is expected to begin shortly. The force main replacement work and installation of temporary pavement is expected to take approximately 2 weeks to complete. Construction will resume later this year for the installation of the final pavement repair.

The contractor for this work will be Guerrera Construction of Oxford, CT. In addition, our engineers, Tighe & Bond, will have a Project Engineer working on this project as well as a full time construction observer in the field while construction is taking place.

The contractor will make every effort to minimize disruption to local residents while the work is taking place. Traffic throughout the project work area will be maintained while work is ongoing with the assistance of either WPCA flagmen or Town of Thomaston Police Officers.

***Thank you in advance for your patience and cooperation in the WPCA's efforts to improve their wastewater collection system.***

Any questions regarding this contract may be directed to:

Lori Carriero, Project Engineer of Tighe & Bond: 203-712-1126

Rob Symington, Construction Observer (Tighe & Bond): 203-512-7711
